

404 1st tutorial question analysis by Munif-uz-Zaman

Topic:

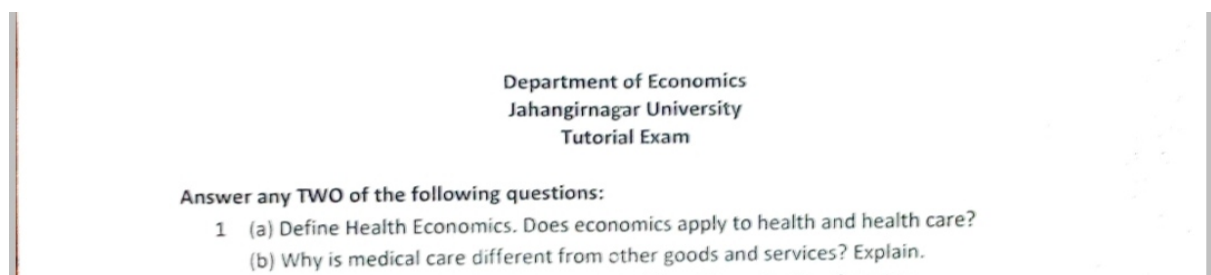

1. Chapter 1
2. Chapter 2
3. Health Production function
4. Grossman Model

Chapter 1

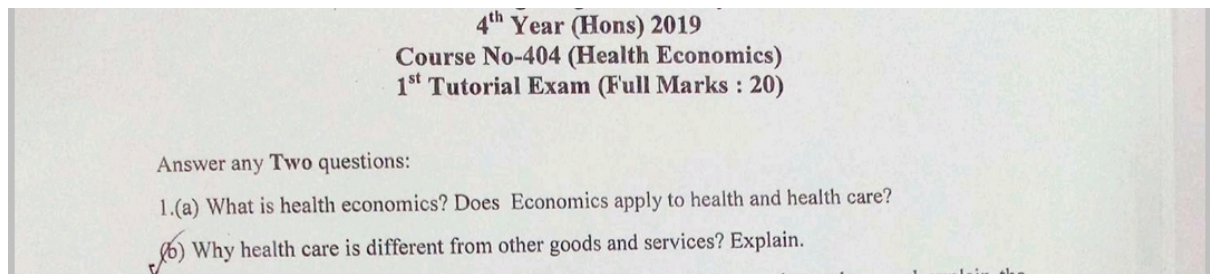

Tutorial 47

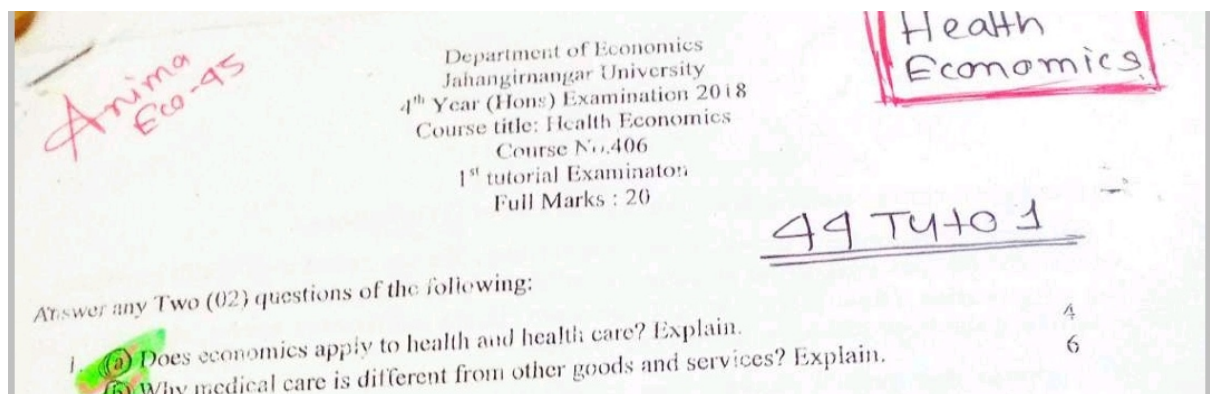

Tutorial 46

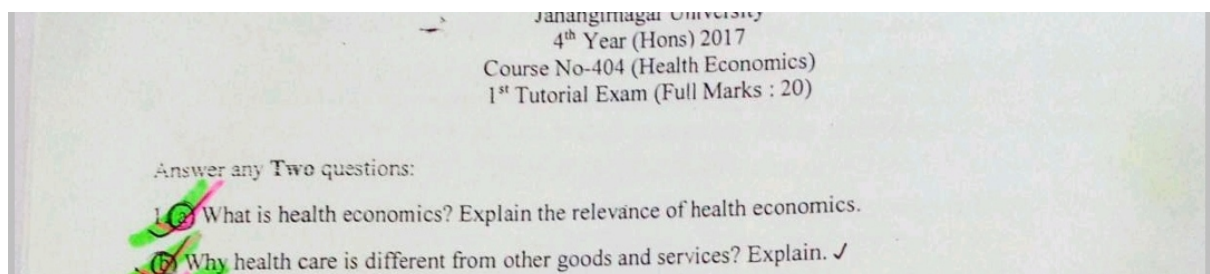

Tutorial 2019

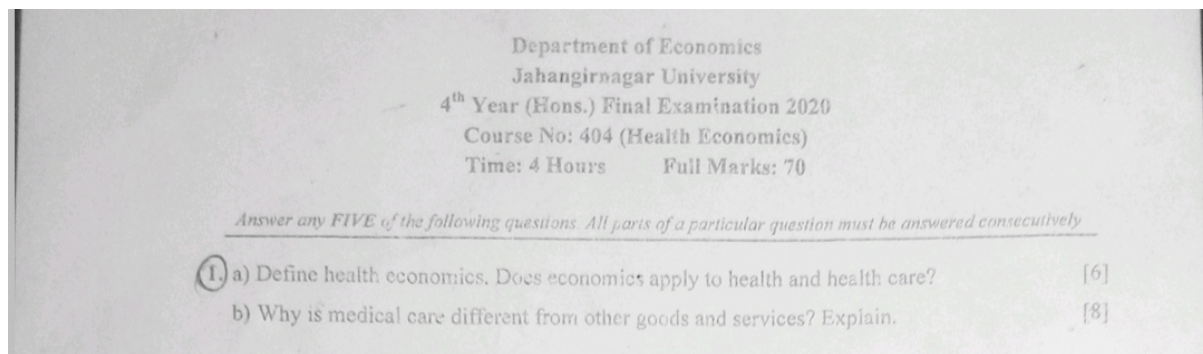

Tutorial 2018

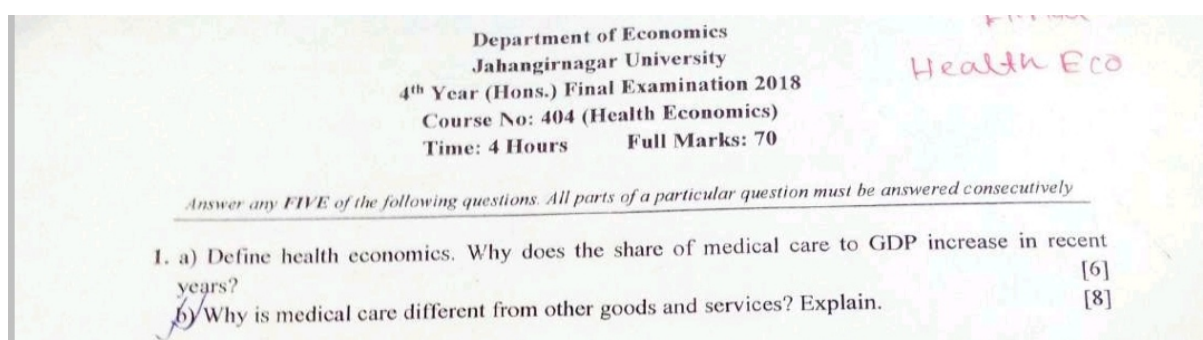

Tutorial 2017

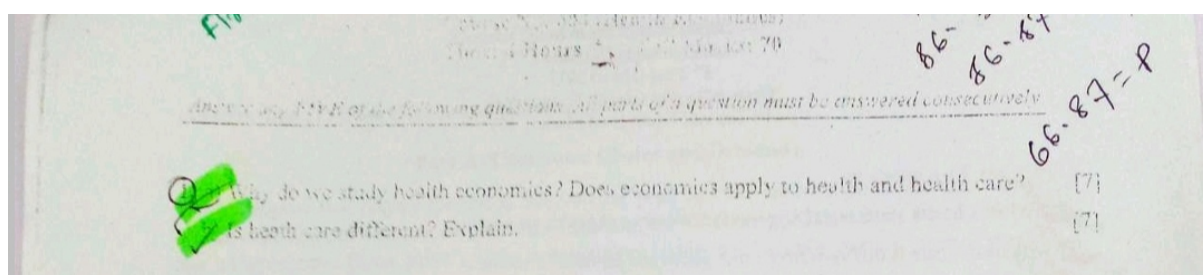

Final 2020

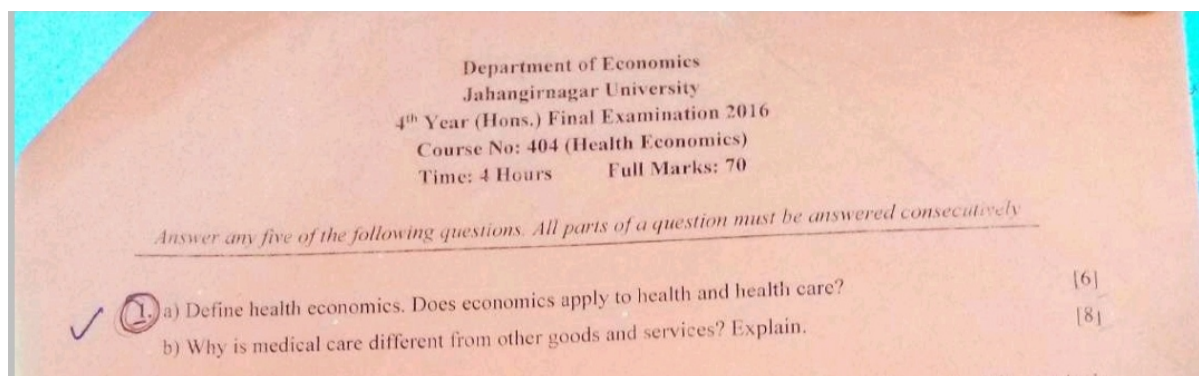

Final 2018

Final 2017

Final 2016

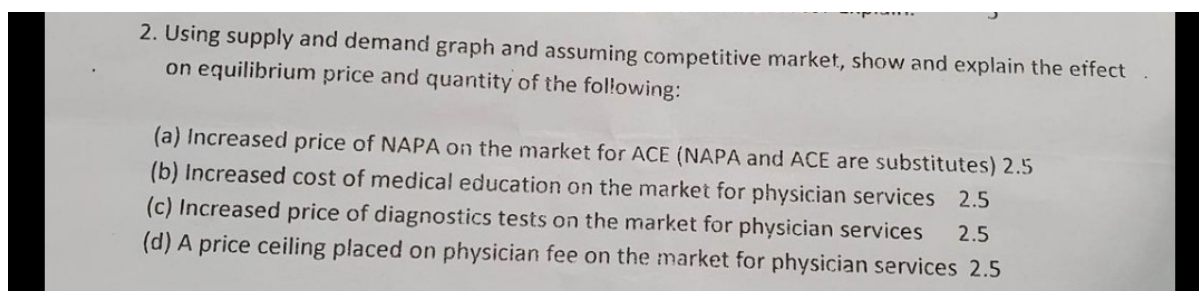

Questions:

1. **Define Health Economics? Explain the relevance of health economics.**
2. **Does Economics apply to health and health care?**
3. **Why health care/medical service is different from other goods and services? Explain**
4. **Why does the share of medical care to GDP increase in recent years?**

Chapter 2

Tutorial 47

Tutorial 46

4. Using supply and demand graph and assuming competitive market, show and explain the effect on equilibrium price and quantity of the following:
- Increased graduations of new doctors on the market for physician service
 - The virtual elimination of smoking in the population on the market for hospital services
 - Increased cost of medical education on the market for physician service
 - The price ceiling placed on physician fee on the market for physician services

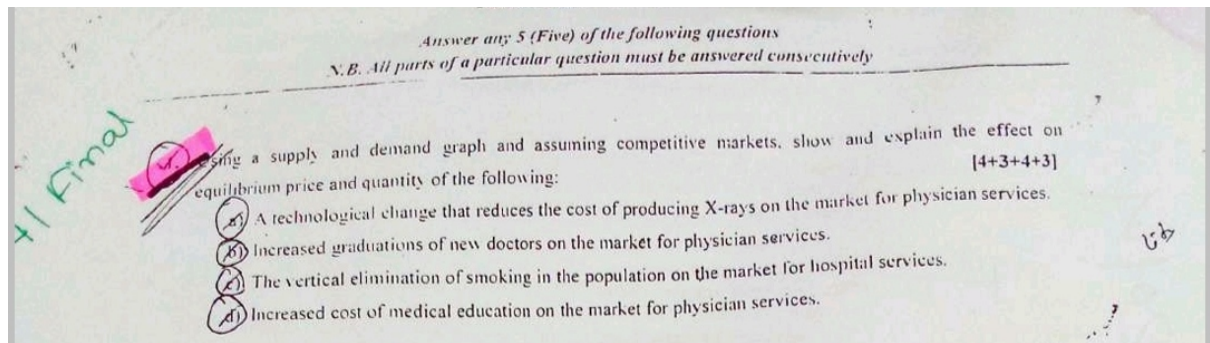

Tutorial 2019

2. Using supply and demand graph and assuming competitive markets, show and explain the effect on equilibrium price and quantity of the following:
- An increase of the price of Ace on the market for Napa (Hint : Ace and Napa are substitutes).
 - A price ceiling placed on physician fees on the market for physician services.
 - Increased cost of medical education on the market for physician services.
 - The virtual elimination of smoking in the population on the market for hospital services.

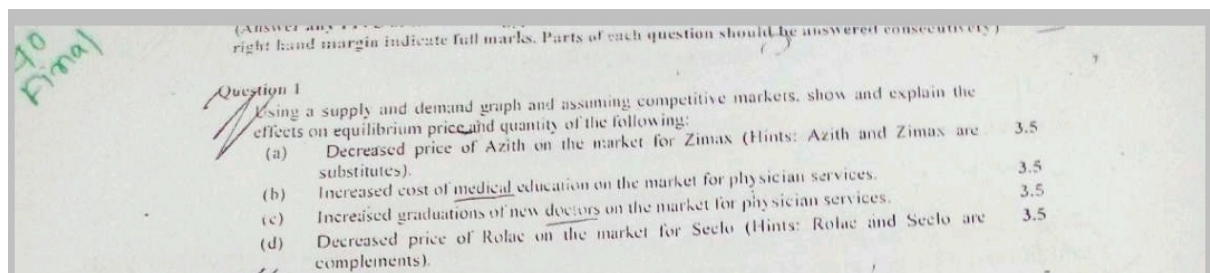

Tutorial 2017

2. Using supply and demand graph and assuming competitive markets, show and explain the effect on equilibrium price and quantity of the following:
- A decrease of the price of Ace on the market for Napa (Hint : Ace and Napa are substitutes).
 - Increased Price of painkillers on the market for antiulcerative drugs (Hint : Painkillers and antiulcerative drugs are complements).
 - Increased cost of medical education on the market for physician services.
 - The virtual elimination of smoking in the population on the market for hospital services.

Final 40

Health Production Function

Tutorial 47

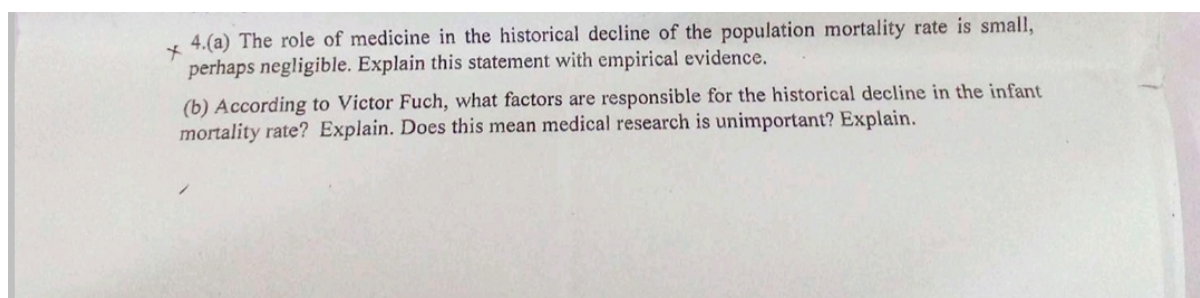

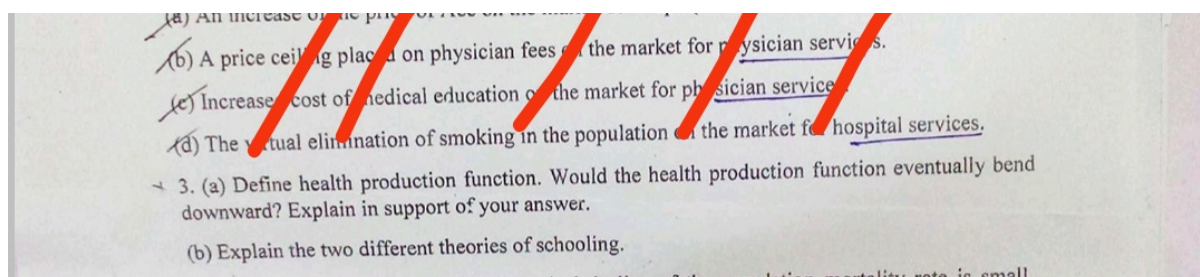

Tutorial 46

**Jahangirnagar University
Tutorial Exam**

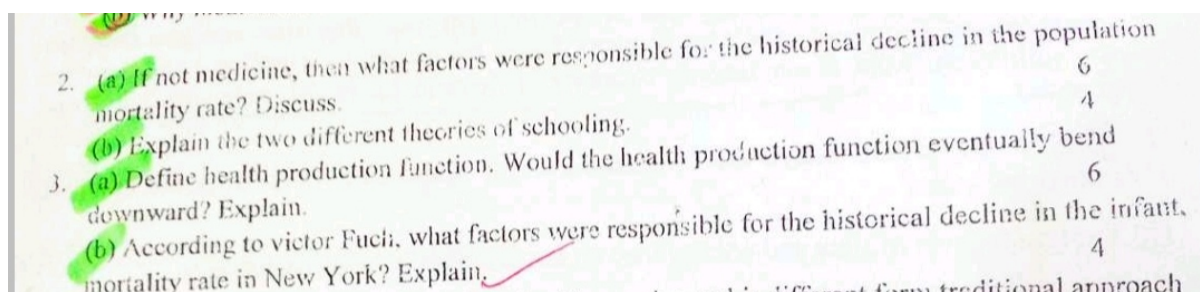

Answer any TWO of the following questions:

1. (a) Define Health Economics. Does economics apply to health and health care?
(b) Why is medical care different from other goods and services? Explain.
2. (a) Define health production function. Would health production function eventually bend downward? Explain in support of your answer.
(b) Explain the two different theories of schooling.

Tutorial 2019

Tutorial 2018

Tutorial 2017

- (c) Increased cost of medical education on the market for physician services.
- (d) The virtual elimination of smoking in the population on the market for hospital services.
3. (a) Define health production function. Would the health production function eventually bend downward? Explain in support of your answer.
- (b) Explain the two different theories of schooling.

6. (a) The role of medicine in the historical decline of the population mortality rate is small, perhaps negligible. Explain this statement with empirical evidence.
- (b) According to Victor Fuchs, what factors are responsible for the historical decline in the infant mortality rate? Explain. Does this mean medical research is unimportant? Explain.

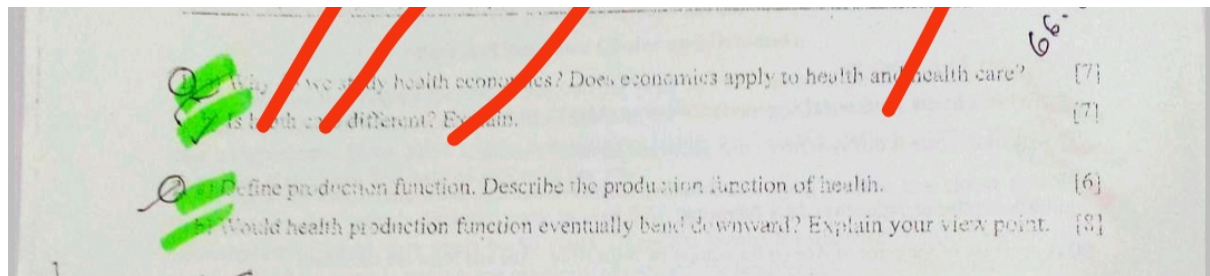

Final 2020

2. a) If not medicine, what factors were responsible for the historical decline in the population mortality rate? Explain. [8]
- b) Explain the two different theories of schooling. [6]
3. a) Define production function. Describe the production function of health. [6]
- b) Would health production function eventually bend downward? Explain in support of your answer. [8]

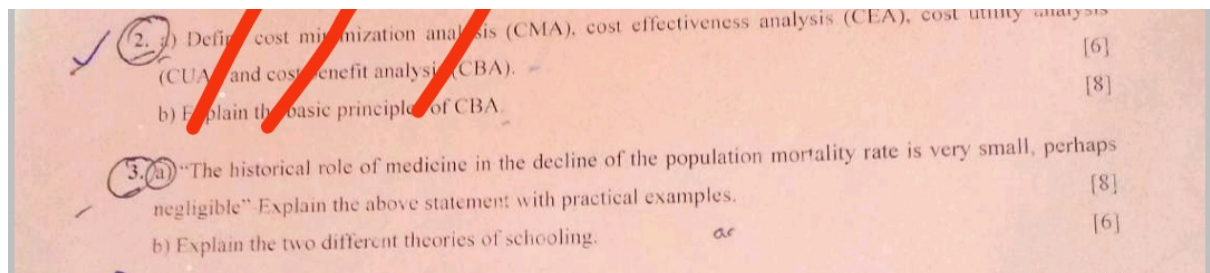

Final 2018

1. a) Define health economics. Why does the share of medical care in GDP increase in recent years? [6]
- b) Why are medical care different from other goods and services? Explain. [8]
2. a) If not medicine, what factors were responsible for the historical decline in the population mortality rate? Explain. [8]
- b) Explain the two different theories of schooling. [6]

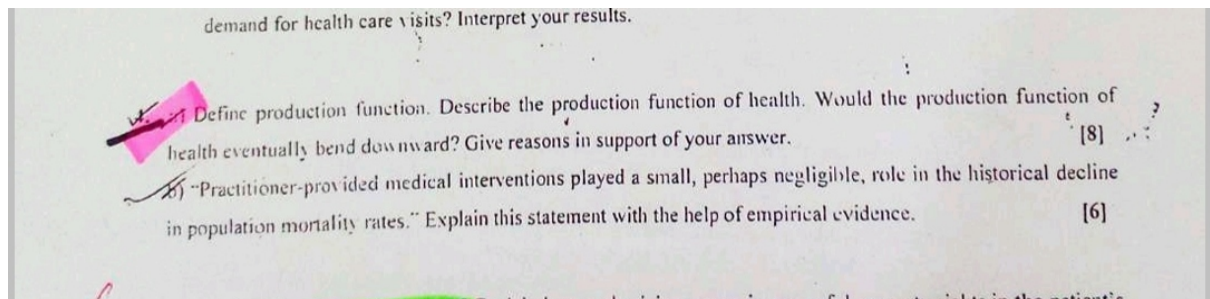

Final 2017

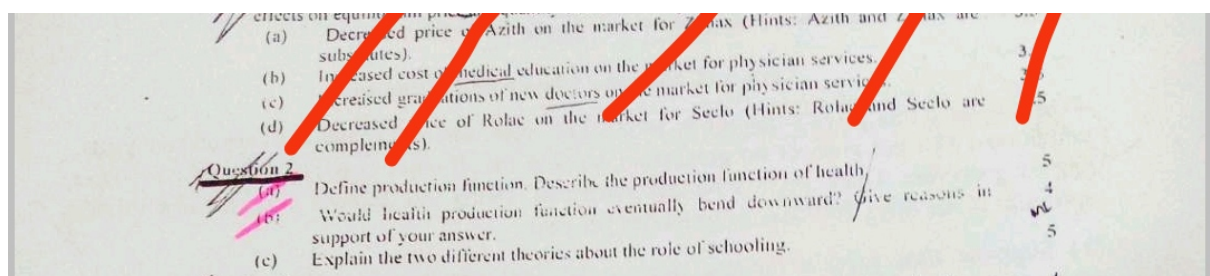

Final 2016

Final 41

Final 40

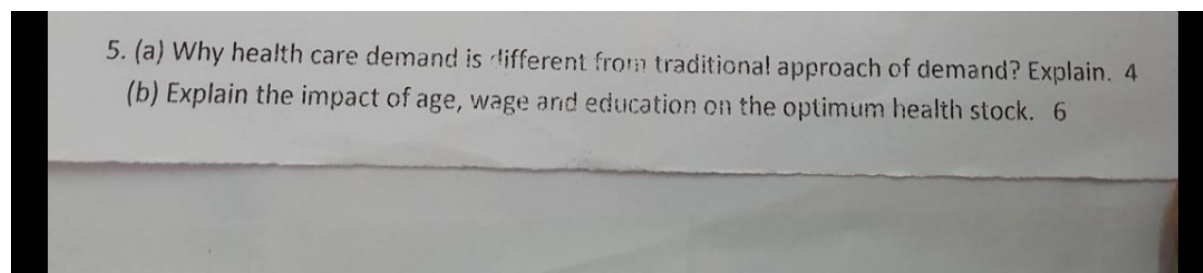

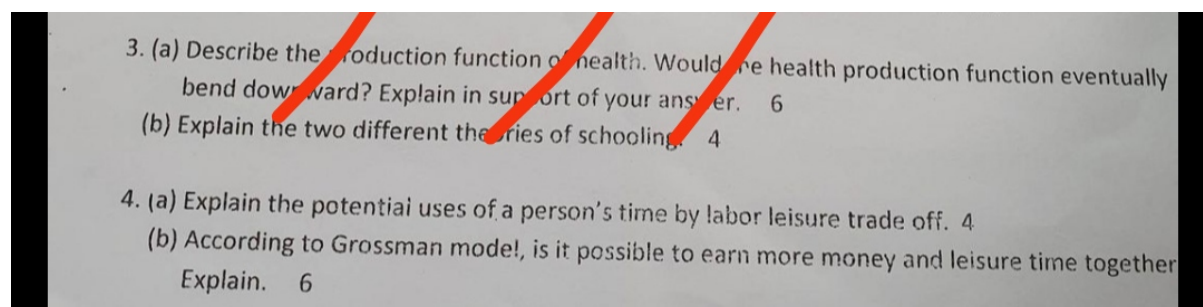

Questions:

1. Define production function. Describe the production function of health. Would health production function bend eventually downward? Give reasons in support of your answer.
2. Explain two different theories about the role of schooling.
3. According to Victor Fuch, what factors are responsible for the historical decline in the infant mortality rate? Explain. Does this mean medical research is unimportant? Explain.
4. "Practitioner-provided medical interventions played a small, perhaps negligible, role in the historical decline in population mortality rates"- Explain this statement with the help of empirical evidence./"The historical role of medicine in the decline of the population mortality rate is very small, perhaps negligible"-Explain the above statement with practical examples

Grossman Model

Tutorial 47

Tutorial 46

1. (a) Define health economics. Does economics apply to health and health care?
(b) Why is medical care different from other goods and services? Explain.
 2. (a) Define health production function. Would health production function eventually bend downward? Explain in support of your answer.
(b) Explain the two different theories of schooling.
 3. (a) Explain the potential use of a person's time by labor-leisure trade-off.
(b) Is it possible to earn more money and more leisure time together? Explain in the light of Grossman model.
- ... and demand curve and assuming competitive market, show and

Tutorial 2018

- mortality rate in New York? Explain.
4. (a) According to Grossman model, how health care demand is different from traditional approach of demand? 4
(b) Explain home good function and health investment function in the light of Grossman model. 3
(c) How optimum health stock is determined? Explain with diagram. 3
 5. (a) Explain, in the light of Grossman model, how an individual chooses optimum amount of income and leisure. 5
(b) How is it possible to earn more money and more leisure time together? Explain, in the light of Grossman model.

Tutorial 2017

- Grossman
4. (a) According to Grossman model, how health care demand is different from traditional approach of demand? ✓
(b) Explain, in the light of Grossman model, the impact of age and education on the optimum health stock.
 5. (a) How would you explain the potential use of an individual's time by labor-leisure trade off? show the equilibrium of an individual's time by labor-leisure line and indifference curve. ✓
(b) Is it possible to earn more income and to take more leisure time together? Explain in the light of Grossman model.

Final 2020

4. a) Explain the potential use of a person's time by labor-leisure trade off. [4]
 b) Is it possible to earn more money and more leisure time together? Explain in the light of Grossman model. [10]
5. a) Explain the determinants of demand for health care visit. [8]
 b) What is the role of time and coinsurance in the health care demand? [6]
6. a) Distinguish between CBA and CBA. [3]

Final 2018

3. a) Explain, in the light of Grossman model, how optimal health stock is determined? [4]
 b) How does an individual investment in health change in response to change in age and education? [7]
 c) What are the limitations of Grossman model? [3]
4. Consider demand curves for Aspirin, estimated for two different sets of consumers: [14]

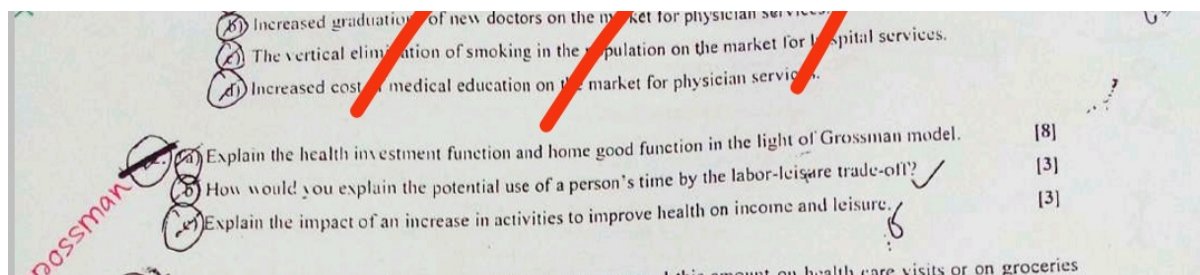

Final 2017

1. Define production function. Describe the production function of health. [6]
 2. Would health production function eventually bend downward? Explain your view point. [8]
3. a) Explain health investment function and home good function in the light of Grossman model. [6]
 b) Explain the impact of age, wage and education on optimal health stock. [8]

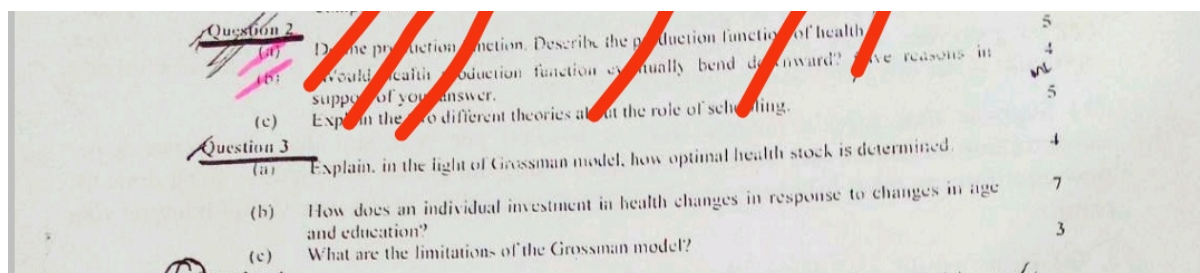

Final 2016

4. a) Explain the potential uses of an individual's time by labor-leisure trade-off? [6]
 b) Is it possible to earn more money and more leisure time together? Explain the light of Grossman model. [8]
5. a) How would you derive the demand curve of health care visit from the theory of consumer choice? [8]
 b) Explain the role of time and coinsurance on the demand for health care visits. [6]

Final 41

Final 40

Questions:

1. Explain the potential uses of a person's time by labor leisure trade off. Show the equilibrium of an individual's time by labor-leisure line and indifference curve
2. According to Grossman model, is it possible to earn more money and leisure time together? Explain.
3. Explain the impact of age, wage and education on the optimum health stock.
4. According to Grossman Model, Why/How health care demand is different from traditional approach of demand? Explain
5. Explain, in the light of Grossman model, how optimal health stock is determined. Explain with diagram.
6. How does an individual investment in health changes in response to changes in age and education?
7. What are the limitations of the Grossman model?
8. Explain health investment function and home good function in the light of Grossman Model

9. **Explain in the light of Grossman model, how an individual chooses optimum amount of income and leisure.**
10. **Explain the impact of an increase in activities to improve health on income and leisure**
