

Annexure i : Concept and Definitions

Age coverage

Age is a strong determinant of labour market. Common age cut-offs and categories are important. The labour-related questions of the survey refer to the population of 15 years old and older. The following age ranges are used in presenting the statistics: 15–24; 25–34; 35–44; 45–54; 55–64; and 65 and over. Besides, statistics is provided separately for youths as the youths are more prone to unstable transition to labour market. However, in setting the minimum LFS coverage age is the fact that the Government of Bangladesh, being aware that many young people, who are unable to continue with higher schooling, enter the labour market instead, has set the legal age for admission to employment at 14 completed years. Given that, inclusion of persons aged 15 years or older may result in the undercount of persons employed or unemployed in the country.

Sex

Sex (male or female) of every individual is recorded, as sex disaggregation of data is a fundamental requirement for gender statistics and in particular for the analysis of the gender gap in the access to the labour market. For policy purposes, all core indicators are broken down by sex, in order to maximize information on any gender gap.

Dwelling

A dwelling is a separate and independent place of abode intended for habitation by one household. Although intended for habitation by one household, a dwelling may, at the time of the survey, be occupied by more than one household.

Household

A household is defined as a group of persons who live together and make common provision for food and other essentials for living. The people in the group may be related or unrelated or a combination of both. A household may consist of only one person or several persons. Stemming from the above definition, lodgers or other permanent residents who live and take their meals with the household are to be counted as household members, even though they may have no blood relationship with the household head. Servants or other paid domestic employees should be counted as part of the household. People who live in the same dwelling, but do not share food expenses or do not eat meals together, are not members of the same household. To be considered a household member, an individual must reside with the other household members in the dwelling for a substantial part of the year (e.g., six-month criterion) and must not be a member of any other household.

Head of household

The Head of the household is the person who manages the income earned and expenses incurred by the household and who is the most knowledgeable person concerning other members of the household. If he or she is not present or available (for example, he or she may be living abroad temporarily), an alternative "Head" must be selected in consultation with senior household members. The following criteria can be taken into account (in priority order) in helping you to decide who the Head of household is:

- a. The household member who is accepted as the Head by other household members.
- b. The household member who is legally responsible for the dwelling (owner or lease holder).
- c. The household member who is the main income earner.
- d. The household member who does most of the household shopping.
- e. The oldest household member.

Work¹

The concept of *Work* is a complex one which must be understood if it is to be used properly in the Labour Force Survey. The questionnaire asks the respondent: "During the previous week, did you do any work for a wage, salary, commission, tips or any other pay, even if only for one hour?" Some examples of work activities are presented further below.

More specifically, **work comprises any activity performed by persons of any sex and age to produce goods or to provide services for use by others or for own use.** The concept of work is aligned with the General production boundary as defined in the System of National Accounts 2008 (2008 SNA) and its concept of economic unit. Examples of work activities to be classified as employment:

- Vending newspapers in the street; cleaning car windshields for tips at traffic lights.
- Managing one's own business or farm even though not involved in producing the output.
- Repairing of work equipment for future operation, e.g. a fisherman repairing his boat or net for future outings.
- Buying or installing equipment and ordering supplies in preparation for opening a new business.
- Work in the household enterprise without pay, but with a share in the earnings/profits of the enterprise.
- Unpaid work in an economic enterprise operated by a related person living in the same household (e.g. work such as cleaning and grading fruits/vegetables).
- Outwork i.e., a practice prevalent in some enterprises where all or part of the production is allocated to different persons or households to be carried out at home and for which these persons or households receive payment on a piece-rate basis, e.g. the master weaver assigning bobs to different households.
- Exchange work i.e., a practice in some countries whereby labour is exchanged between households for productive purposes such as the work performed by a farm operator of members of his family on the farm of another operator.
- Paid domestic services, including baby sitting and teaching children in other persons' homes in exchange for cash payment, board and lodging or payment in kind such as clothing.
- Cooking food for labourers on one's farm where food is provided as part of the labourer's pay.
- Paid apprenticeship and on-the-job training which is associated with the productive activities of an enterprise.
- Paid religious activities of members of religious orders.
- Military duties of career military personnel and conscripts as well as engagements in equivalent civilian services.

Labour Force

The concept labour force refers to the current supply of labour for the production of goods and services in exchange for pay or profit. The form of work identified as employment sets the reference scope of activities for labour force statistics. In the QLFS, the "labour force" refers to persons 15 years or older who contribute or are available to contribute to the production of goods and services in the country; and consists of employed and unemployed.

Labour force status

Categories for labour force status used to break down labour market indicators at the individual level are based on the following categories:

- Employed
- Unemployed

¹Extracts from: International Labour Office. *Resolution concerning statistics of work, employment and labour underutilization*. Report III, 19th ICLS (Geneva, 2-11 October 2014), pp. 47-65.

- Not in the labour force.

Persons in employment

Persons in employment are defined as all those of working age who, during a short reference period, were engaged in any activity to produce goods or provide services for pay or profit or own use production of goods. They comprise:

- a) employed persons "at work", i.e. who worked in a job for at least one hour;
- b) employed persons "not at work" due to temporary absence from a job, or to working-time arrangements (such as shift work, flexitime and compensatory leave for overtime).

One hour criterion

A person is considered to have engaged in a given form of work when performing such form of work for at least one hour during the relevant, short reference period. Use of this one-hour criterion ensures coverage of all the activities engaged in, including part-time, temporary, casual or sporadic activities, as well as comprehensive measurement of all inputs of labour into production.

Temporary absence from work

Employed persons on "temporary absence" during the PREVIOUS WEEK refers to those who, having already worked in their present job, were "not at work" for a short duration but maintained a job attachment during their absence. In such cases:

- (a) "job attachment" is established on the basis of the reason for the absence and in the case of certain reasons, the continued receipt of remuneration, and/or the total duration of the absence as self-declared or reported, depending on the statistical source;
- (b) the reasons for absence that are by their nature usually of short duration, and where "job attachment" is maintained, include those such as sick leave due to own illness or injury (including occupational); public holidays, vacation or annual leave; and periods of maternity or paternity leave as specified by legislation;
- (c) reasons for absence where the "job attachment" requires further testing, include among others: parental leave, educational leave, care for others, other personal absences, strikes or lockouts, reduction in economic activity (e.g. temporary lay-off, slack work), disorganization or suspension of work (e.g. due to bad weather, mechanical, electrical or communication breakdown, problems with information and communication technology, shortage of raw materials or fuels):
 - i. For these reasons, a further test of a duration threshold and/or receipt of remuneration (EMP_09) should be used. The threshold should be, in general, not greater than three months taking into account periods of statutory leave entitlement specified by legislation or commonly practiced, and/or the length of the employment season so as to permit the monitoring of seasonal patterns. Where the return to employment in the same economic unit is guaranteed this threshold may be greater than three months.
 - ii. For operational purposes, where the total duration of the absence is not known, the elapsed duration may be used.

Included in employment are:

- (a) persons who work for pay or profit while on training or skills-enhancement activities required by the job or for another job in the same economic unit, such persons are considered as employed "at work" in accordance with the international statistical standards on working time;
- (b) apprentices, interns or trainees who work for pay in cash or in kind;
- (c) persons who work for pay or profit through employment promotion programmes;
- (d) persons who work in their own economic units to produce goods intended mainly for sale or barter, even if part of the output is consumed by the household or family;
- (e) persons with seasonal jobs during the off season, if they continue to perform some tasks and duties of the job, excluding, however, fulfilment of legal or administrative obligations (e.g. pay taxes), irrespective of receipt of remuneration;
- (f) persons who work for pay or profit payable to the household or family:
 - i. in market units operated by a family member living in the same or in another household, or
 - ii. performing tasks or duties of an employee job held by a family member living in the same or in another household.
- (g) regular members of the armed forces and persons on military or alternative civilian service who perform this work for pay in cash or in kind.

Excluded from employment are:

- (a) apprentices, interns and trainees who work without pay in cash or in kind;
- (b) participants in skills training or retraining schemes within employment promotion programmes, when not engaged in the production process of an economic unit;
- (c) persons who are required to perform work as a condition of continued receipt of a government social benefit such as unemployment insurance;
- (d) persons receiving transfers, in cash or in kind, not related to employment;
- (e) persons with seasonal jobs during the off season, if they cease to perform the tasks and duties of the job;
- (f) persons who retain a right to return to the same economic unit but who were absent for reasons specified in paragraph 29(c), when the total duration of the absence exceeds the specified threshold and/or if the test of receipt of remuneration is not fulfilled. For analytical purposes, it may be useful to collect information on total duration of absence, reason for absence, benefits received, etc.;
- (g) persons on indefinite lay-off who do not have an assurance of return to employment with the same economic unit.

Full-time employed

The *fully employed* group comprise those who worked full usual or actual number of hours or more in the reference week. In the QLFS of Bangladesh, this is considered to be 40 hours. The questionnaire asks questions on time-related underemployment of all employed people who usually/actually worked less than statutory hours during the previous week.

Persons in own-use production work

Own-use production of goods

These are all those of working age who, during a short reference period, performed any activity to produce goods for own final use, where:

- a) "any activity" refers to work performed in the various activities under paragraph (b) and (c) below for a cumulative total of at least one hour;
- b) production of "goods" (within the 2008 SNA production boundary) covers:
 - i. producing and/or processing for storage agricultural, fishing, hunting and gathering products;
 - ii. collecting and/or processing for storage mining and forestry products, including firewood and other fuels;
 - iii. fetching water from natural and other sources;
 - iv. manufacturing household goods (such as furniture, textiles, clothing, footwear, pottery or other durables, including boats and canoes);
 - v. building, or effecting major repairs to, one's own dwelling, farm buildings, etc.

Own-use provision of services

These are all those of working age who, during a short reference period, performed any activity to provide services for own final use, where:

- b) provision of "services" (beyond the 2008 SNA production boundary but inside the General production boundary) covers:
 - i. household accounting and management, purchasing and/or transporting goods;
 - ii. preparing and/or serving meals, household waste disposal and recycling;
 - iii. cleaning, decorating and maintaining one's own dwelling or premises, durables and other goods, and gardening;
 - iv. childcare and instruction, transporting and caring for elderly, dependent or other household members and domestic animals or pets, etc.
- c) "for own final use" is interpreted as production where the intended destination of the output is *mainly* for final use by the producer in the form of capital formation, or final consumption by household members, or by family members living in other households:
 - i. the intended destination of the output is established in reference to the specific goods produced or services provided, as self-declared (i.e. mainly for own final use);
 - ii. in the case of agricultural, fishing, hunting or gathering goods intended mainly for own consumption, a part or surplus may nevertheless be sold or bartered .

Essential items that need to be collected, using various statistical sources, to support national accounts, and for household and sectoral analyses of own-use production work are:

- a) the working time of own-use producers associated with each relevant activity cluster collected using short time units (such as minutes or hours according to the source);
- b) the estimated value of the production (i.e. goods or services), and/or the amount of goods, consumed or retained by the household and by family members in other households;
- c) the estimated amount and/or value of any part or surplus sold or bartered, where applicable; and
- d) the expenses incurred in relation to this production.

৩.৬ রান্নার জ্বালানির উৎস

সারণি ৩.৬.১ তে পল্লি ও শহরভিত্তিক খানায় রান্নার জ্বালানি ব্যবহার সংক্রান্ত উপাত্ত দেখানো হয়েছে। এখানে রান্নার জ্বালানির ক্ষেত্রে প্রথমত কাঠ/জ্বালানি (৪৪.১৩ শতাংশ) ব্যবহৃত হয়, এরপরে রয়েছে গোবর/পাতা/খড় (২৮.৪৪ শতাংশ) এবং প্রাকৃতিক গ্যাস/এলপি গ্যাস (২৭.০৭ শতাংশ)। সাধারণত শহরাঞ্চলে বেশি প্রাকৃতিক গ্যাস/এলপি গ্যাস ব্যবহার করা হয়। এক্ষেত্রে পাওয়া যায়, পল্লিতে ১০.৩৮ শতাংশ প্রাকৃতিক গ্যাস/এলপি গ্যাস ব্যবহার হয় অপরদিকে শহরাঞ্চলে ব্যবহার হয় ৬৫.২৪ শতাংশ।

3.6 Fuel used for cooking

Table 3.6.1 gives the data in particular of households using cooking fuel according to rural and urban. Considering the disaggregation of different cooking stuff in rural the wood/firewood (44.13 per cent) was the main fuel used for cooking followed by Dung/Leave/Straw (28.44 per cent) and natural gas/LP gas (27.07 per cent). For the urban area, it was 65.24 per cent of natural gas/LP gas used for cooking whereas it was 10.38 per cent in rural.

Table 3.6.1: Percentage distribution of households by sources of fuel for cooking (%)

Fuel used for cooking	Rural	Urban	Total
Wood/firewood	52.24	25.59	44.13
Dung / Leave / Straw	37.25	8.3	28.44
Natural Gas / LP Gas	10.38	65.24	27.07
Kerosene	0.0	0.0	0.0
Electricity	0.04	0.62	0.21
Bio-Gas	0.04	0.17	0.08
Others	0.05	0.08	0.07
Total	100	100	100

৩.৭ স্যানিটেশন সুবিধা

সারণি ৩.৭.১ তে মূলত পয়ঃনিষ্কাশন ও টয়লেট ব্যবহারের সুবিধা সংশ্লিষ্ট তথ্যাদি দেয়া হয়েছে। এখানে দেখা যায় যে, ৪৪.৮৫ শতাংশ খানায় স্যানিটারি টয়লেট ব্যবহার করে, এরপরই ৪৪.৮৪ শতাংশ খানায় পিট ল্যাট্রিন, ১০.০২ শতাংশ খানায় কীচা ল্যাট্রিন ব্যবহৃত হয় এবং অবশিষ্ট ০.২৯ শতাংশ খানার কোন টয়লেট সুবিধা নেই। উল্লেখ্য, শহর অঞ্চলে ৭১.২৯ শতাংশ স্যানিটারি টয়লেট ব্যবহার করে, পল্লিতে যা ৩৩.২৮ শতাংশ। পল্লি এলাকায় পিট ও কীচা ল্যাট্রিনের ব্যবহার শহরের তুলনায় বেশি।

3.7 Sanitation facilities

Table 3.7.1 gives the data reflecting the access and toilet facilities for the people who live in rural and urban both. It was found that 44.85 per cent of the households use sanitary toilets, followed by 44.84 per cent using pit latrines, 10.02 per cent use Katcha latrines and the rest 0.29 per cent of the households have no toilet to use. In urban, 71.29 per cent use sanitary toilets and 33.28 per cent in rural areas use sanitary toilets. For the rural area, the use of Pit (53.22 per cent) and Katcha (13.1) latrines was higher than in the urban area.

Table 3.7.1: Access to toilet facilities by type and locality (%)

Type of toilet	Rural	Urban	Total
Sanitary (water-sealed)	33.28	71.29	44.85
Pit latrine	53.22	25.67	44.84
Katcha toilet	13.1	3.02	10.02
Open air / No toilet	0.4	0.02	0.29
Total	100.00	100.00	100.00

৩.৮ খাবার পানির উৎস

সারণি ৩.৮.১ তে খানায় পানীয় জলের উৎস সম্পর্কিত তথ্যাদি প্রদান করা হয়েছে। নিচের সারণি থেকে এটি স্পষ্ট যে, নলকূপের ব্যবহার পল্লিতে ৯০.৬৯ শতাংশ এবং শহরে ৫৭.২৫ শতাংশ যা পানীয় জলের প্রধান উৎস হিসেবে বিবেচিত হয় এবং মোটের উপর ৮০.৫৩ শতাংশ পানীয় জলের উৎসই হলো নলকূপ। এছাড়াও, পানীয় জলের দ্বিতীয় উৎস হিসেবে প্রদত্ত সারণিতে দেখা যাচ্ছে ট্যাপের অবস্থান, যা ১৭.৪৭ শতাংশ।

3.8 Sources of drinking water

Table 3.8.1 depicts results concerning the source of drinking water for the households. Here the use of Tube well was the dominant (80.53 per cent) source of drinking water both in rural (90.69 per cent) and urban (57.25 per cent) areas and tap water was in 2nd position (17.47 per cent) as the source of drinking as well.

Table 3.8.1: Distribution of households by main source of drinking water and locality (%)

Main source of drinking water	Rural	Urban	Total
Tap water	6.72	42.1	17.47
Tube well/deep tube well	90.69	57.25	80.53
Well	0.38	0.05	0.28
Pond/River/ Ditch/ Canal	0.85	0.1	0.62
Others	1.36	0.5	1.1
Total	100	100	100

Chapter 4

Education and Vocational Training

শিক্ষা এবং বৃত্তিমূলক প্রশিক্ষণ

১৫ বছর এবং তদুর্ধ্ব বয়সী খানা সদস্যদের সাক্ষরতার হার, শিক্ষাগত যোগ্যতা অর্জনের মাত্রা, এবং সাধারণ শিক্ষা ব্যবস্থার বাইরে বৃত্তিমূলক প্রশিক্ষণের সুযোগগুলো অধ্যায় ৪-এ উপস্থাপন করা হয়েছে। এছাড়াও অধ্যায়টিতে বৃত্তিমূলক প্রশিক্ষণের সময়কাল এলাকা, লিঙ্গ ত্রৈমাসিক ভিত্তিতে বিভক্ত করে দেখানো হয়েছে।

Education and vocational training

Findings on the literacy rate, educational attainment levels, and opportunities for vocational training outside of the general education system among household members aged 15 and older are presented in Chapter 4. The chapter also breaks down the length of vocational training by locality and sex on the quarter basis.

৪.১ কর্মক্ষম জনসংখ্যার সাক্ষরতা সন্দেশ

বাংলাদেশের জাতীয় ভাষা বাংলা বা অন্য যে কোনো ভাষায় পড়া ও লেখার সক্ষমতাকে সাক্ষরতা হিসেবে এ জরিপে বিবেচনা করা হয়েছে। সারণি ৪.১.১ অনুসারে, ১৫ বছর এবং তদুর্ধ্ব বয়সীদের মধ্যে সাক্ষরতা ৭৭.৭ শতাংশ। যাদের মধ্যে সাক্ষরতা শহরাঞ্চলে ৮৪.৮ শতাংশ অপরপক্ষে পল্লি এলাকায় ৭৪.৬ শতাংশ, শহরাঞ্চলে সাক্ষরতার হার বেশি। অপরপক্ষে, পুরুষদের মধ্যে সাক্ষরতার হার ৭৯.৫ শতাংশ এবং মহিলাদের মধ্যে সাক্ষরতার হার ৭৫.৮ শতাংশ।

4.1 Literacy profile of the working-age population

Literacy is defined in this survey as the capacity to read and write in either Bangla, the national language of Bangladesh, or in another language. According to Table 4.1.1, it shows that 77.7 per cent of people who are 15 years and older are literate. Among them 84.8 per cent exist in urban and 74.6 per cent in rural areas; it seems that the literacy rate in urban areas is higher than the rural areas. Considering the sex group, male literacy rate was 79.5 per cent and female literacy rate was 75.8 per cent.

১৫-২৯ বছর বয়সী যুব মহিলা ও পুরুষের মধ্যে সাক্ষরতার হারের ব্যবধান খুবই সামান্য, যেখানে পুরুষদের তুলনায় মহিলাদের সাক্ষরতার হার বেশি দেখা যায়: দেশের যুব সাক্ষরতার হার ৯৫.৫ শতাংশ যার মধ্যে পুরুষদের ৯৫ শতাংশ এবং মহিলাদের জন্য ৯৫.৯ শতাংশ। যুব সাক্ষরতার হার শহরাঞ্চলে সর্বাধিক লক্ষ্য করা যায় যা ৯৬.২ শতাংশ, যার মধ্যে মহিলা ৯৬.৭ শতাংশ এবং পুরুষ ৯৫.৭ শতাংশ। পল্লিতে যুব সাক্ষরতার হার পুরুষদের ক্ষেত্রে ৯৪.৮ শতাংশ এবং মহিলাদের ক্ষেত্রে ৯৫.৫ শতাংশ।

The only age group where there was hardly a gap was youth (aged 15-29), and even then, the literacy rate was higher for female than for male. The total literacy rate among the country's youth was 95.5 per cent, where it was 95 per cent for male and 95.9 per cent for female. Youth literacy rates were highest in urban areas, a total of 96.2 per cent where 96.7 per cent female and 95.7 per cent male. In the rural area youth literacy rate was 94.8 per cent for male and 95.5 per cent for female.

Table 4.1.1 Literacy rate of the population aged 15 and older, by sex, age group and area

Age group	Rural			Urban			Bangladesh		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
15-29	94.8	95.5	95.2	95.7	96.7	96.2	95	95.9	95.5
30-64	70.5	63.5	67	83.8	77	80.5	74.6	67.5	71
65+	44.6	19.2	34	65	33.9	52.2	49.4	22.6	38.3
Total	76.5	72.7	74.6	86.6	83	84.8	79.5	75.8	77.7

৪.২ কর্মক্ষম জনসংখ্যার শিক্ষা সংক্রান্ত

সারণি ৪.২.১ অনুসারে, জরিপকালীন ১৫ বছর এবং তদুর্ধ্ব বয়সী কর্মক্ষম জনগোষ্ঠীর ১২.৪৩ শতাংশ বর্তমানে বিদ্যালয়ে যায়, ৬৬.২২ শতাংশ অতীতে বিদ্যালয়ে গিয়েছিল এবং ২১.৩৫ শতাংশ কখনও বিদ্যালয়ে যায়নি। তথ্যের লিঙ্গ বিভাজন অনুসারে, জরিপের সময় যথাক্রমে ১৩.৭৯ শতাংশ ১৫ এবং তদুর্ধ্ব বয়সী পুরুষ এবং ১১.০৯ শতাংশ ১৫ এবং তদুর্ধ্ব বয়সী মহিলা বর্তমানে বিদ্যালয়ে যায়। যারা কখনও বিদ্যালয়ে যাননি তাদের মধ্যে পুরুষদের (১৯.৩৯ শতাংশ) তুলনায় উল্লেখযোগ্যভাবে মহিলা (২৩.২৯ শতাংশ) বেশি ছিল।

4.2 Education profile of the working-age population

According to Table 4.2.1, only 12.43 per cent of the working population aged 15 and older was enrolled in school at the time of the survey, while 66.22 per cent had previously attended school and 21.35 per cent had never attended. According to the sex breakdown of data 13.79 per cent of male and 11.09 per cent of female aged 15 and older were enrolled in school at the time of the survey. There were significantly more female (23.29 per cent) than male (19.39 per cent) among those who had never attended school.

Table 4.2.1 Population aged 15 and older by attended school status, sex and area (%)

Status of attended school	Rural			Urban			Bangladesh		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Attended school as % of working age population 15+									
Yes, currently attending	13.47	10.23	11.83	14.55	13.1	13.77	13.79	11.09	12.43
Yes, Attended in the past	64.34	63.55	63.94	72.6	70.43	71.6	66.82	65.62	66.22
No, never attended	22.19	26.22	24.23	12.85	16.47	14.63	19.39	23.29	21.35
Total	100	100	100	100	100	100	100	100	100

সারণি ৪.২.২ অনুযায়ী, ১৫ বছরের বেশি বয়সী ১.৩৫ শতাংশ প্রাপ্তবয়স্কদের কোন আনুষ্ঠানিক শিক্ষা ছিল না (কোন ক্লাস পাস করেনি)। অপরপক্ষে ৩১.৫৬ শতাংশ প্রাথমিক বিদ্যালয়, ৪৯.৮৮ শতাংশ মাধ্যমিক বিদ্যালয় এবং ৭.৭৯ শতাংশ স্নাতক সম্পন্ন করেছে।

Table 4.2.2 shows that, 1.35 per cent of adults over the age of 15 did not have any formal education (No class was passed). 31.56 per cent had completed primary school, 49.88 per cent had completed secondary and 7.79 per cent had completed tertiary education.

Table 4.2.2 Proportion of population aged 15 and older, by level of completed education, sex and area (%)

Broad education group	Rural			Urban			Bangladesh		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
None	1.61	1.68	1.64	0.68	0.68	0.68	1.35	1.36	1.35
Primary	32.27	36.36	34.11	26.05	25.23	25.64	30.50	32.77	31.56
Secondary	51.77	51.53	51.66	40.88	50.68	45.75	48.69	51.25	49.88
Higher Secondary	7.12	6.16	6.69	13.26	11.87	12.57	8.86	8.01	8.46
Tertiary	6.07	3.29	4.82	18.32	11.02	14.69	9.54	5.78	7.79
Others	1.16	0.98	1.08	0.81	0.52	0.67	1.06	0.83	0.95
Total	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

৪.৩ বৃত্তিমূলক প্রশিক্ষণ

আনুষ্ঠানিক শিক্ষাব্যবস্থার বাইরে বৃত্তিমূলক প্রশিক্ষণের মাধ্যমে শ্রমশক্তিতে অনেক জনবলের দক্ষতা বিকাশের প্রয়োজনীয় সুযোগ রয়েছে। ১৫ বছর এবং তদুর্ধ্ব বয়সী সকল উত্তরদাতাদেরকে জিজ্ঞাসা করা হয়েছিল যে তারা গত ১২ মাসে (জানুয়ারি-ডিসেম্বর, ২০২১ সময়ে) কখনও কোন বৃত্তিমূলক প্রশিক্ষণে অংশ নিয়েছিল কিনা এবং প্রশিক্ষণ নিয়ে থাকলে এটির মেয়াদ, তারা কোথা হতে প্রশিক্ষণ পেয়েছে এবং এটি কী ধরনের প্রশিক্ষণ ছিল। যদি একজন অংশগ্রহণকারী একাধিক প্রশিক্ষণ কোর্স গ্রহণ করে থাকে, তবে শুধুমাত্র সবচেয়ে গুরুত্বপূর্ণ প্রশিক্ষণটি বিবেচনা করা হয়েছিল।

জরিপের ফলাফল অনুসারে (সারণি ৪.৩.১), মোট কর্মক্ষম জনগোষ্ঠীর ১.৪৬ শতাংশ বৃত্তিমূলক আনুষ্ঠানিক প্রশিক্ষণ কোর্সে অংশ নিয়েছে অপরপক্ষে ৯৮.৫৪ শতাংশ গত ১২ মাসে বৃত্তিমূলক প্রশিক্ষণ নেয়নি। মহিলা পুরুষ উভয়ের জন্য, প্রশিক্ষণ পল্লী এলাকায় ১.৪৯ শতাংশ এবং শহর এলাকায় ১.৩৯ শতাংশ। মহিলাদের মধ্যে শহরে প্রশিক্ষণ গ্রহণের হার বেশি যা ১.১৪ শতাংশ।

4.3 Vocational Training

Through vocational training outside of the formal educational system, many people have a valuable opportunity to develop skills that are applicable in the workforce. All respondents who were 15 years and older asked if they had ever attended any vocational training during last 12 months (from January-December 2021) and, if so, how long it lasted, where they got it, and what kind of training it was. If a participant had taken more than one training course, only the most crucial training was covered.

According to the result of the survey (Table 4.3.1), 1.46 per cent of the total working-age population received formal vocational training courses whereas 98.54 per cent did not receive vocational training during the last 12 months. The percentage of training was higher in rural areas (1.49%) than in urban areas (1.39%) for both gender. Among female, more training was provided in urban areas (1.14 per cent).

Table 4.3.1 Proportion of population aged 15 and older who has received training, by sex and area (%)

Received Training	Rural			Urban			Bangladesh		
	Male	Female	Total	Male	Female	Total	Male	Female	Total

৫.২ অর্থনৈতিক কর্মকাণ্ড/শ্রমশক্তি

১৫ বছর এবং তদুর্ধ্ব বয়সী একজন ব্যক্তি বর্তমানে অর্থনৈতিকভাবে কর্মক্ষম বলে বিবেচিত হবে যদি তিনি জরিপকালীন সময়ে গত সাত দিনে কমপক্ষে এক ঘণ্টা কাজ করেন বা চাকরিতে নিয়োজিত আছেন অথবা সাময়িকভাবে কাজে অনুপস্থিত কিংবা কাজ করার জন্য প্রস্তুত যদি কাজ পাওয়া যায়।

5.2 Economic activity/Labour Force (LF)

A person aged 15 years and over is considered currently economically active if he or she is either employed for at least one hour during the seven days prior to the survey or has a job attachment but is temporarily absent from work or is available to work if work could be found.

শ্রমশক্তি = কর্মে নিয়োজিত + বেকার জনগোষ্ঠী

LF = Employed + Unemployed

Table 5.2.1 Working age population aged 15 and older, by Labour force status, sex and area

Labour force status	Rural			Urban			Bangladesh		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Labour force	33.19	21.5	54.69	14.07	4.29	18.36	47.27	25.78	73.05

জরিপের ফলাফল হতে দেখা যায় (সারণি ৫.২.১), জরিপকালীন ১৫ বছর এবং তদুর্ধ্ব বয়সী ৭৩.০৫ মিলিয়ন জনসংখ্যা শ্রমশক্তিতে নিয়োজিত আছেন, যার মধ্যে পুরুষ

Based on the survey findings (Table 5.2.1), an estimated 73.05 million population aged 15 or older were in the labour force at the time of the survey. The male labour force accounted for 47.27 million (64.71 per

কর্মক্ষম জনসংখ্যা হল আইনসম্মত কাজের বয়সের জনসংখ্যা যা ১৫ বছর এবং তদুর্ধ্ব বয়সী জনসংখ্যা। শ্রমশক্তিতে অংশগ্রহণের হারকে শ্রমশক্তির সাথে শ্রমজীবী জনসংখ্যার অনুপাতকে সংজ্ঞায়িত করা হয়, যা শতাংশ হিসাবে প্রকাশ করা হয়। শ্রমশক্তি হল কর্মে নিয়োজিত ব্যক্তির ও বেকার ব্যক্তির সংখ্যার সমষ্টি। সুতরাং, শ্রমশক্তিতে অংশগ্রহণের হার পরিমাপের জন্য কর্মসংস্থান এবং বেকারত্ব উভয়ের পরিমাপ প্রয়োজন। শ্রমশক্তিতে অংশগ্রহণের হার শ্রমবাজারের অন্যান্য সূচকের সংজ্ঞার সাথে সম্পর্কিত। নিষ্ক্রিয়তার হার হল ১০০ বিয়োগ শ্রমশক্তিতে অংশগ্রহণের হার, যেখানে অংশগ্রহণের হার ০ এবং ১০০ এর মধ্যে একটি সংখ্যা দ্বারা প্রকাশ করা হয়।

The working-age population is the population above the legal working age – often aged 15 and older. The labour force participation rate is defined as the ratio of the labour force to the working-age population, expressed as a percentage. The labour force is the sum of the number of persons employed and the number of persons unemployed. Thus, the measurement of the labour force participation rate requires the measurement of both employment and unemployment. The labour force participation rate is related by definition to other indicators of the labour market. The inactivity rate is equal to 100 minus the labour force participation rate when the participation rate is expressed as a number between 0 and 100.

$$\text{এলএফপিআর} = \frac{\text{শ্রমশক্তি}}{\text{১৫ ও তদুর্ধ্ব বয়সী জনসংখ্যা}} \times ১০০$$

$$\text{LFPR} = \frac{\text{Labour Force}}{\text{Population 15 years and older}} \times 100$$

Table 5.3.1 Labour force participation rate 15 and older, by age group, sex and area

(In thousand)									
Age group	Rural			Urban			Bangladesh

Total	80.3	51	65.5	79.2	23.7	51.2	80	42.8	61.2

সারণি ৫.৩.১ হতে দেখা যায়, ২০২২ সালে বাংলাদেশের শ্রমশক্তিতে অংশগ্রহণের হার (১৫ বছর এবং তদুর্ধ্ব বয়সী জনসংখ্যার অনুপাত যারা বর্তমানে অর্থনৈতিকভাবে কর্মক্ষম) ৬১.২ শতাংশ। লিঙ্গ ভিত্তিক, শ্রমশক্তিতে অংশগ্রহণের হার পুরুষ ৮০.০ শতাংশ এবং মহিলা ৪২.৮ শতাংশ। শহরের (৫১.২ শতাংশ) তুলনায় পল্লি (৬৫.৫ শতাংশ) এলাকায় এ হার কিছুটা বেশি। বয়স গ্রুপ ভিত্তিক ৩০-৬৪ বয়সী কর্মীদের মধ্যে শ্রমশক্তিতে অংশগ্রহণের হার সর্বোচ্চ যা ৬৪.৯ শতাংশ, এরপর ১৫-২৯ বয়সী ৬১.২ শতাংশ এবং ৬৫ বছর বা তদুর্ধ্ব বয়সী সর্বনিম্ন যা ৩২.৪ শতাংশ।

As shown in Table 5.3.1, Bangladesh's labour force participation rate (the proportion of population aged 15 or older who were currently economically active) in 2022 was estimated at 61.2 per cent. By sex, the labour force participation rate was 80.0 per cent for males and 42.8 per cent for females. The rate was slightly higher for the rural areas (65.5 per cent) than that of urban (51.2 per cent). The highest labour force participation rates by broad age groups were among workers aged 30-64 (64.9 per cent) followed by 15-29 (61.2 per cent) and lowest in 65+ age group (32.4 per cent).
